Talent, careers@onecommunity.bank

Summary:

The Director of Technology is responsible for the management, strategy, and execution of the IT infrastructure for the organization. The Director of Technology is responsible for managing colleagues within the IT Department, liaising with other departments leaders ensure IT meets department strategy, and demonstrate thought leadership to leverage technology to provide next level solutions.

To be successful in this hands-on position of One Community Bank's Director of Technology you should have an excellent technical aptitude as well as superior project and people management skills. An outstanding Director of Technology should be able to ensure smooth, secure, and consistent technical operations within the organization.

Essential Duties and Responsibilities include the following:

- Manage all aspects of IT operations, help desk, and supporting systems.
- Directing the effective delivery of networks, development, application support and third-party provider sourcing and processes.
- Develop strategy as it relates to the organization's IT infrastructure (computer and information systems, security, communication systems, etc.).
- Create service level metrics to ensure that IT is meeting the needs of internal clients in a timely and efficient manner.
- Preparing, managing, and tracking financial budgets and present proposals for capital projects.
- Proposing strategic solutions and recommending new systems and software to improve IT processes.
- Work with stakeholders across the bank to identify business and technology needs and to optimize the use of information technology.
- Identifying vulnerabilities, the need for upgrades, and opportunities for improvement.
- Ensuring reported issues are resolved in a timely manner.
- Work collaboratively with information security to ensure the constant safety and security of the bank's networks and infrastructure.

- The duties and responsibilities described are not a comprehensive list. Additional tasks may be assigned as necessitated by business demands.

Required Qualifications / Skills / Abilities:

- Degree in computer science or a related field required.
- Financial institution technology experience preferred.
- At least five years of information technology experience.
- Proof of continued education such as certifications is desirable.
- Three plus years of management experience in an IT environment.
- Sound working knowledge of IT operations, systems, and development.
- Excellent communication and interpersonal skills.
- Strong leadership and project management skills.
- Strong analytical and problem-solving skills.
